Subject: George AFB results

Hi James,

This just came in, the results for the March 21, 2001 soil pesticide/pcb sampling at George AFB.

This data was reviewed using the CADRE software. The level of data review is equivalent to Tier 1B level of review. My understanding is that no further review/validation of this data is requested.

I will be sending you the hard copy data package when I receive it. This should be filed in the site administrative record.

Sample Y0557 is a QA sample. Check with Steve Remaley at 4-1596 if you would like to know more about how the lab performed on the analysis of this sample.

Rich Freitas, ext. 4-2315

If you have any questions regarding this spreadsheet please contact the CCS Information Desk at 703-264-8789 or 703-264-9353.
